

Consent Form

Consent Form: extarction

Informed Consent for Endodontic (Root Canal) Therapy

Procedure: extarction (1, 2, 3)

Attending Dentist: Dr. Sarah

1. Nature of Procedure: I hereby authorize the dental team, under the supervision of Dr. Sarah, to perform extarction. The procedure has been explained to me, and I understand its purpose.

2. Risks and Complications: I understand that root canal treatment is a procedure to retain a tooth which may otherwise require extraction. The associated risks include post-operative pain or swelling, blockages or curves in canals preventing complete filling, separation (fracture) of clinical instruments inside the root canals, root perforation, or future treatment failure which could necessitate surgical intervention or extraction. I understand that a permanent restoration (such as a core buildup and crown) is highly recommended after treatment to prevent tooth fracture.

3. Acknowledgment: I have read this consent form, or had it read and explained to me. I have had opportunity to ask questions, and all questions have been answered to my satisfaction. I understand that I am signing this digitally as my legal consent.
